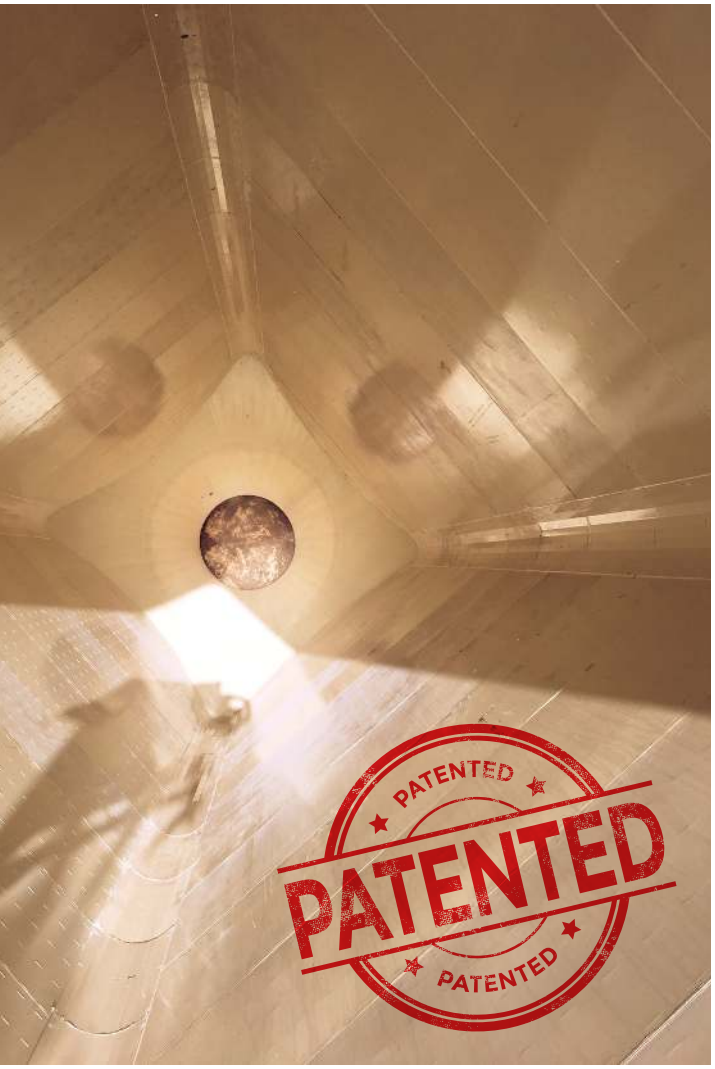
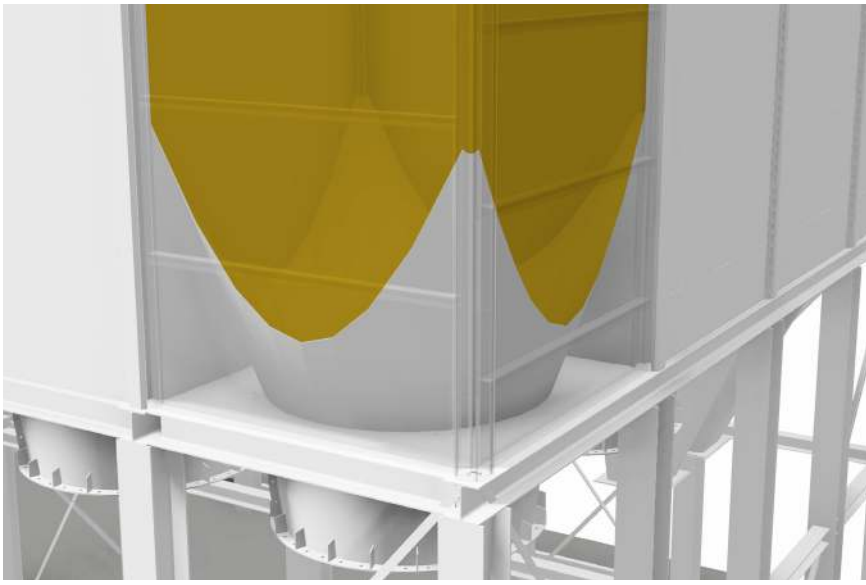
SILO CONSTRUCTION & ENGINEERING

SCE's patented butterfly hoppers ensures optimal outflow





Same angle all around avoids funnel flow

- **No dead corners**
- **Allows same angle all around**
- **Perfect outflow**
- **Patent**

The hopper, a crucial part of a silo and thus designed with the greatest care for your product. We will ensure a perfect transfer from the silo to the machine process. Every product requires its own type of hopper, which are always completely tailor-made.

SCE has a patent on the special rounded 'butterfly hoppers' which offer an equal angle all around in the bin and results in a flawless flow-out.

This butterfly hopper system is widely accepted by many satisfied customers in various industries.
